

# ORION WALL MOUNTED AIR FRESHENER AND ODOUR REMOVAL OZONE GENERATOR

## Electrical Specification

Input voltage: 230V, 50Hz

Input Power: 35W      Air Flow Rate: 50m<sup>3</sup>/h

## Performance

Ozone Output: 500mg/hour.

Two pulse setting,

3 & 6 hour high output settings

## Mechanical Specification

Weight: 1.5kg

Dimensions: 38cm x 9cm x 24cm

## Safety Features:

Over- load current protection

On/Off power light

Ozone generation light

Red fault indicator light

Remote control

The Orion Ozone generator has been designed to help reduce smells and odours in the office place. The Orion will also help to reduce Sick Building Syndrome. With its ability to pulse small amounts of ozone into a room throughout the day, this will eliminate general body odours and other smells from food, animals, carpets including smells that might come in from outside. At the end of the day the unit can be run over longer periods up to 6 hours to reduce the bacterial and viral contamination in the room. When staff arrive in the office the next day the whole area will smell fresh and the room will be free of most known bacterial and viral contamination. It is well known that ozone is one of the most powerful sanitizers and odour removing chemicals. Ozone is over 3200 times more effective than chlorine gas. In small areas ozone can be used to sanitise the whole room

Ozone will eliminate virtually all smells and odours as well as mould spores. Ozone also kills most bacteria and viruses including MRSA, Norovirus, Pseudomonas Aeruginosa, E-coli 157, Legionella Pneumophila, Campylobacter Jejuni, Salmonella Enterica and Staphylococcus Aureus.

## EASY TO USE & INSTALL

The Orion can be easily hung on a wall near to a power supply. It is supplied with a remote control for ease of setting. There are two pulse setting and two long run settings.

## TYPICAL APPLICATIONS

The Orion is ideal for use in catering departments to clear smells in store rooms and kitchens. Ideal for static caravans, kennels, toilets, boot rooms, can even be used in changing rooms, gyms, wash rooms. Also ideal for pubs and clubs. In fact anywhere there is a problem with smells, odours or poor air quality
