

# TAURUS HIGH CAPACITY OZONE GENERATOR FOR USE ON WATER LINES

<b>TAURUS</b>	<b>4grm Specification:</b>
<b>Ozone output:</b>	<b>4000 mg/hour</b>
<b>Dimensions of case:</b>	<b>360 x 180 x 180 mm</b>
<b>Weight:</b>	<b>5.5 kg</b>
<b>Electrical Supply:</b>	<b>240v – 50Hz</b>
<b>Control:</b>	<b>Automatic on flow</b>
<b>Ozone control</b>	<b>Adjustable</b>
<b>Metal Cabinet</b>	<b>Stainless steel</b>
<b>Air Filters</b>	<b>On inlet tine to cells</b>
<b>Non-Return Valve</b>	<b>Ozone Outlet</b>

The Taurus Ozone generator is the global leader in its performance class. It is designed for use where water in pipe work needs to be sanitised. It can sanitise water at up to 2000 litres per hour to eliminate bacteria, viruses, odours and algae from water lines. The AQUARIUS utilises a unique patented double dielectric barrier discharge technology to achieve an industrial leading ozone output of 4,000 mg/h .

The Taurus can produce very high levels of Ozone within the pipe work. The Taurus is ideal for use in misting systems in green houses, reducing green algae in ponds and paddling pool. Greatly increasing efficiency in cooling towers. It will also reduce bacteria and viruses if the unit is used on water lines to washing machines and ice makers. Ozone is over 3200 times more effective than chlorine gas.

Ozone kills most bacteria and viruses including MRSA, Norovirus, Pseudomonas Aeruginosa, E-coli 157, Legionella pneumophila, Campylobacter Jejuni, Salmonella Enterica and Staphylococcus Aureus.

## OTHER TYPICAL APPLICATIONS

The Taurus has many uses, it is ideal for use on any 15mm piping to reduce to risk of Legionella pneumophila. The Taurus can be installed in ships water system to reduce odours. It is ideal for use in hospitals where you need to eliminate pathogens found in washing machines that are used for contaminate clothing. Bottling plants will find the Taurus helpful in reducing Iron in the water as well as brightening the look of the water sample
