RHINO has been designed to withstand very heavy wear and tear. The extra thick 1.5mm stainless steel single panel construction will help to reduce damage from vandalism. The VANDAL PROOF push button self-closing glass filler is warrantied against damage and as it cannot swivel, will greatly reduce the chances of flooding.

The new bubbler removes any chances of cross contamination from users mouths. The Twin Tap model comes with two heavy duty push type auto shut off sport bottle fillers.
